Article title: Tribological Behavior of Electrodeposited Ni-Fe Multilayer Coating
Authors: V. Torabinejad, M. Aliofkhazraei, A. Sabour Rouhaghdam, and M. H. Allahyarzadeh
Journal: Tribology Transactions
Bibliometrics: Volume 60, Number 5, 2017, 923–931
DOI: 10.1080/10402004.2016.1230687

The authors have run a new set of experiments and they want to add some new figures (Fig. 5d and Fig. 6a, 6b) and change one of the figures (Fig. 8) in addition to previous presented figures in this paper. It is notable that all discussions and conclusions are still reliable in original published paper.

Figure 5d. Worn surface of multilayer Ni-Fe coating after sliding distance of 30 m (sample with 20% duty cycle).

Figure 6. Worn surfaces of (a) MD and (b) MF multilayer coatings at high magnification.
Figure 8. SEM image of alumina counterpart after 30m sliding.
