Corrigendum to “Divergent roles of BECN1 in LC3 lipidation and autophagosomal function”

The authors have recently noticed that the rightmost image of HeLa and the middle image of BECN1+/−-BECN1 in Figure 2E appeared from the same field of vision. After checking our original data and files, we realized that we have made the mistakes by misplacing samples for electron microscopy (EM). Since we could not determine how we made the mistakes, we decided to re-do all relevant experiments to validate our original results. All EM experiments have recently been reconducted for all three cell types: HeLa, BECN1+/− and BECN1+/−-BECN1. We would like to replace the original Figure 2E and 2F with the corrected version. The authors would like to emphasize that this correction has not changed the description, interpretation, or the original conclusions of the manuscript. The authors apologize for this error.
